

To our patients and their families,

The physicians, nurses, and healthcare professionals of The West Clinic would like to express our deepest gratitude to thousands of you who have waged your own personal battles with cancer and placed your lives, trust, and confidence in our hands over the past 30 years. This has been an incredible journey for all of us. We celebrate you and your families for your indomitable spirit, strength, courage and inspiration and remember those who are no longer with us, but whose lives touched us deeply.

The West Clinic has seen remarkable growth over the past 30 years and built a team second to none in breadth of expertise, dedication to excellence, and commitment to compassionate care, treating each patient as a person – not just treating the disease.

When Dr. Bill West established The West Clinic in 1979, there was one small office in the downtown area. Today, we are one of the nation's premier centers for oncology, hematology, radiology, and other advanced medical care with eight locations, over 30 physicians, and 400 plus employees. Our patients have access to state-of-the-art imaging technologies and interventional radiology procedures performed in our own Ambulatory Surgery Center.

Our commitment to clinical research has always been central to our mission to "Leave No Stone Unturned" in the treatment and care of every patient. Through our partnership with the Accelerated Community Oncology Research Network, a nationwide network of leading community oncology practices, we have helped determine most of the major treatment advances for breast, colon, lung and prostate cancers, lymphoma, and many other diseases over the past decade.

Thank you for helping The West Clinic change the face of cancer care.

The Physicians of The West Clinic

Celebrating 30 years on the front line of cancer care.

Past and present, we're giving more people a future.
